# Create Hot Buttons and Ticket Templates

To begin, **Hot Buttons** must be enabled. Select the menu sequence **Main > Preferences > Display**. Enable the **Template Hot Buttons Open Tickets** checkbox.

## Adding a New Hot Button

Open a ticket window. Configure your ticket as needed.

In this example a broker, a specific algo, a participation rate of 15 % and other parameters have been selected.

Click the green **Plus (+)** icon. The ticket template editor is displayed.

Template Hot Buttons Open Tickets

Display

## TSIMAGINE<sup>™</sup> Pocket Guides © 2022 TSImagine

#### Refresher

Hot buttons are the color-coded buttons often found in ticket windows. A list of all your hot buttons can be shown from the Hot Button component bar.

Hot buttons are like spreadsheet macros, saving you clicks. A listed hot button invokes the defined Order Ticket with the defaulted parameters pre-populated.

## Ticket Template Editor

The left-hand column shows the ticket's details.

- Enter a Name and Description.
- Use the A button at the bottom of the left-hand column to highlights algorithm-driven fields in use.
- Press the right Arrow to transfer these to the template.
- Enable the Enable Hot button check box.
- Choose the button's Text and Background colors.

# **Edit Hot Buttons within Tickets**

Pencil Open template editor icon.

Equity Ticket

button. Click Save.
